

Caring For Your Floors ~ Laminate

Cleaning

The “Do”s:

- **Vacuum** or **sweep** floors before cleaning, to remove dust and dirt.
- Use a **microfibre mop** to help avoid scratching the floor.
- **Spray** a light **mist** of **water**.
- Clean the floor in **small sections**.
- A **neutral pH**, non-toxic cleaner can also be used.

Tip: Use a
Spray Mop

The “Don’t”s:

- **Do not use** a **wet mop** on the floor.
- **Do not use** **scouring pads** or **chemicals** that may contain abrasives, soaps, waxes, ammonia or silicon.
- **Do not use** **steam mops** (regardless of what product sales people may say), or any form of **scrubbing machine**.

General Care Tips

- Use a **dry mop** / dust mop **regularly** to help remove any dirt that may damage the floor.
- **Wipe up** any **spills** as soon as possible to avoid damage.
- Furniture legs, such as on **chairs**, should have **felt pads** to help avoid scratches.
- **Heavy objects** should be **lifted** not dragged.
- Some **footwear**, such as **high heel** shoes, may also damage the floor.
- **Pets** should have paws kept clean and nails trimmed to minimise any damage.
